TERMINUS OF ROADWAY TO BE VACATED

VACATED PER THE LANE COUNTY BOARD OF COMMISSIONERS ORDER NO. 95-8-23-14, FILED AUGUST 31, 1995, IN THE COMMISSIONERS JOURNAL BOOK 156, PAGES 561-577.
BEFORE THE BOARD OF COUNTY COMMISSIONERS OF LANE COUNTY, OREGON

DIRECTOR'S REPORT

IN THE MATTER OF VACATING GLADYS FOLEY GATEWAY (COUNTY ROAD NUMBER 1242) WITHOUT A PUBLIC HEARING (19-02-16, 17, & 21)

Gladys Foley Gateway (County Road Number 1242) was established as a 30-foot wide public gateway in 1947 to provide access to the Gladys Foley farm which at that time was landlocked. The former Foley farm lands are now owned by a timber company. The easterly portion of the gateway (approximately 0.63 mile) was previously vacated by Board Order No. 95-8-23-14 when the adjoining owner obtained access by way of a perpetual easement at another location. The remaining portion of the gateway is a 14-wide gravel road and has been maintained by the petitioners. The road is completely contained within the petitioner's property and does not serve any other properties.

The Surveyor's Office of the Department of Public Works has received a valid petition signed by the owners of 100% of the property abutting the proposed vacation requesting, by the authority of ORS 368.351, a vacation without a public hearing. The petitioner's request is to vacate the public interest in the road and transfer the right of way into private ownership.

The Surveyor's Office notified Century Link Communications, Lane Electric Cooperative, Northwest Natural Gas, various other agencies including Transportation Planning and Lane County Planning sections of the Lane County Department of Public Works, and the nearby property owners regarding the vacation. The agencies and landowners either had no objection or did not respond to the referral.

The petitioners have stated there are overhead powerlines and underground utility lines within the area to be vacated. An easement will be reserved for all existing utilities.

A written report is provided, marked as Exhibit "C", determining the special benefit of the vacation to the applicant pursuant to Lane Manual 60.853(3) is de minimis.

The proposed vacation will benefit the general public as it is not needed for transportation purposes for the public, no landowner will be denied access to their property and it relieves the County of any future obligations for this section of roadway. It is therefore recommended the portion of the right of way established as a public gateway, and as described in the Order, be vacated. It is further recommended the vacation be allowed without a public hearing.

STAFF REPORT

Notification of Determination of Amount of Special Benefit Deposit in Connection with a Proposed Vacation of a portion of “Gladys Foley Gateway,” A Gateway Road, Pursuant to Lane Manual 60.853(3)(a)

Date: August 24, 2017

Applicants: Douglas Grossman and Kathleen Moran, Members of Rockport Partners, LLC.

PROPOSED VACATION OF A PLATTED ROAD

The Petitioners are proposing to vacate the remaining portion Gladys Foley Gateway, County Road No. 1242, from Rodgers Road, southeasterly to its terminus, and retaining a public utility easement for existing electric and telephone utility lines.

The road right of way is 30 feet wide and approximately 2,917 feet long, and is approximately 2.00 acres. The road contains a 14 foot wide gravel road, a bridge with two 4 foot corrugated pipe culverts, and electric and telephone utility lines.

Upon the vacation of the platted road, full property rights will revert and vest in the rightful owners in accordance with ORS 368.366 (1)(c) and (1)(d).

NATURE OF BENEFIT TO BE RECEIVED IF THE PLATTED ROAD IS VACATED

Lane Manual 60.853(3) “In addition to payment of the deposit and final fees referenced in subsections (1) and (2) above, a vacation of public property or public interest in property under the jurisdiction of the County governing body shall require payment by the petitioners of a deposit equal to the estimate of special benefit that results from the vacation and disposition of property to the benefitted property owners”.

1. Special Benefit Defined:

Lane Manual does not define the term “Special Benefit”; however, in appraising acquisitions for right of way, a special benefit is defined as “advantages arising from a public improvement for which property has been acquired under eminent domain accruing directly and solely to the advantage of the property remaining after the partial acquisition” This definition does not include a general benefit which is defined as a benefit “accruing to the community at large, to the area adjacent to the improvement, or to other property similarly situated as that acquired but which is not acquired.” In Oregon, a “Special Benefit” is used to offset damages caused by the acquisition (See ODOT Right of Way Manual 4.310).

Although special and general benefit definitions apply to acquisitions through eminent domain, the Right of Way staff applies the same principles to the definition of a “Special Benefit” for the vacation of a petitioned road. When used in the context of a proposed vacation of a gateway road, a practical definition follows.

“The advantages arising from the vacated portion of the platted road accruing directly and solely to the advantage of the adjacent property after the vacation.”
2. Special Benefit to Evaluate:

The road is improved and adjoins Map and Tax Lot 19-02-21-00-00105 and 19-02-17-00-01000, both under the same ownership. Upon the vacation of the public road, full rights will revert back to the fee property owners along with all the benefits that result in private ownership, except that a public utility easement will be retained for existing electric and telephone lines.

3. Special Benefit to Property Owner(s):

Upon the vacation of the public road, the encumbrance is removed and the property owner receives full rights of ownership in accordance with the law, except the reservation of a utility easement.

The property is identified as Map and Tax Lot# 19-02-21-00-00105 & 19-02-17-00-01000, combined, and is approximately 461 acres outside the right of way, and 463 acres with the right of way. The amount of Road Right of Way to be vacated is approximately 2.00 acres. The special benefit is the 2.00 acres of right of way, less the retained public utility easement, reverted back to the landowner.

VALUE INDICATION(S) OF PROPERTIES TO BE BENEFITED

The test for estimating a special benefit must be specific and measurable, which can be justified through an increase in market value due to change in a more profitable use. In this case, using the “Highest and Best Use” concept in conjunction with the “Sales Comparison” approach is the most appropriate method for determining a “Special Benefit.”

4. Neighborhood Description and Subject; Properties Highest and Best Use Analysis

Neighborhood The portion of platted road Gladys Foley Gateway to be vacated is near the Community of Creswell, Oregon. The neighborhood is a mixture of rural residential 10 acre minimum (RR10), exclusive farm use (EFU) impacted forest minimum (F2), non-impacted forest (F1). The lots range from mostly 10.00 acre to 40.00 acres, and up to 462 acres.

Subject Property (Map and Tax Lot# 19-02-21-00-00105 & 19-02-17-00-01000, combined). This property is zoned exclusive farm use (E-40) 40 acre minimum, and is currently unimproved.

5. Sales Analysis (Sales Comparison)

Using the “Sales Comparison Approach” method, the Right of Way appraiser performed market research that included review of comparable sales, listings, pending sales, communication with Lane County real estate staff, and personal experience.

Recent sales and listings were used to analyze the subject property. The comparables shared similar acreages, property zonings, were located in similar market areas, and the comparable sales occurred in 2014 and 2015, and there are two similar 2017 Listings. The comparable sale lot sizes ranged between 327.28 to 750.00 acres with the sale per acre prices ranging $1,887 to $5,500 per acre. The comparables analyzed are located in the appraisers work file.

Based on the analysis of the comparable sales with the subject property, and other market research completed, the appraiser finds that the advantage arising from the added acreage after the vacation of the road to be $1,200 ($2,000/acre X 2 acres X 30% of fee value). Therefore the estimated value of the special benefit for the property is $1,200.
SUMMARY AND RECOMMENDATION OF SPECIAL BENEFIT

Lane Manual 60.853(3)(a) The estimated value of the special benefit and the amount of money to be deposited shall be determined by the Public Works Director. In the event of an estimated special benefit value of less than $2,500, it shall be considered de minimis and a payment of deposit for special benefit shall not be required.

The relevant factors used to determine a “Special Benefit” have been examined. There is no evidence that the proposed vacation will change the property to a more profitable value due to the size increase. The only advantage arising from the vacation is the result of returning full fee ownership to the owners, except for a utility easement. Based on the data and analysis contained in this report, the appraiser finds a special benefit applicable to the proposed vacation that would result from this action.

Pursuant to Lane Manual 60.853(3)(a), a “Special Benefit” must be determined. Based on the estimation of value and under the highest and best use premise of adjacent land, the “Special Benefit” to the adjacent property is estimated to be $1,200 and below the value considered de minimus. The appraiser concludes payment of “Special Benefit” is not required ($0.00).
