Road Paving Special Assessment MSBU Process

Summary

Interested property owners looking to pave their neighborhood’s roads can do so through a special assessment process. This process would involve the County coordinating and paying the up-front cost for the design and construction the paved road. After construction is complete, the cost is divided between the benefiting property owners and can be paid immediately or paid on their annual property tax bill over a period of 15 years.

The process can be initiated by a property owner. If interested the property owner should contact the Sr. Assessment Coordinator via phone at (941) 708-7450 x 7435 or via e-mail at Publicworks.assessments@mymanatee.org to discuss the neighborhood where the property owner is and potential costs to see if it would be a good candidate for this process.

If it appears to be a good project and the property owner would like to proceed, the property owner will need to follow the process outlined below. Ultimately, the MSBU project is brought in front of the Board of County Commissioners at a public hearing, and the Board will make the final decision on whether the MSBU will be approved.

Process

1. A petition is submitted by the property owner(s) with 67% or more of the benefiting property owners supporting the project. The purpose of the petition is to show that the neighborhood supports the project, acknowledges that they will be responsible for the full cost of the project, and would like more information. Petitions should be submitted to the following address:

Manatee County
Public Works Department
Infrastructure Planning Division
Attn: Sr. Assessment Coordinator
1022 26th Ave E
Bradenton, FL 34208

E-mail: Publicworks.assessments@mymanatee.org

2. Once the petition has been submitted and verified, a conceptual design and preliminary engineering estimate is completed by the County.

3. A public information meeting is scheduled with the property owners in the neighborhood. Staff will explain the MSBU and assessment process, provide more details on the project, and answer any questions regarding the proposed project. Items that will be discussed include the preliminary engineering estimate, method of calculating the assessment, and cost to the property owners.
4. After the public information meeting is held, the County will conduct a postcard poll to determine if the property owners in the neighborhood are still in favor of the project.

   a. If 67% or more of the property owners are still in favor of the project, a public hearing is scheduled to present the potential MSBU project to the Board of County Commissioners. (See step 5.)

   b. If the project does not meet the 67% threshold, a letter will be mailed to the property owners stating that we are not going to proceed with the project at this time.

5. Once the public hearing with the Board of County Commissioners is scheduled, notices will be sent to property owners 20 days prior to the hearing. The potential MSBU project will be presented to the Board of County Commissioners, and they will make a final decision.

6. If the Board of County Commissioners approve the MSBU project, the County will design and construct the project.

7. After construction is complete, a second public hearing will be held between January 1 and September 15. Property owners will be notified of their assessments. They will have 30 days to pay the assessment without interest. If not paid in the 30-day period, the assessment will automatically be placed on the tax bill for 15 years at the current rate of interest, which is 5%. These assessments can be paid off at any time along with interest and they are assumable by new property owners if the property is sold.

If you would like further information, please contact the Sr. Assessment Coordinator (941) 708-7450 x 7435 or E-mail Publicworks.assessments@mymanatee.org
Petition for ___________________ at ___________________.

This petition is to confirm that the property owners whose name, address, PID#, and signature below are interested in requesting additional information on the County creating a Municipal Service Benefit Unit for the above project. If approved, the County would coordinate the project and initially pay the costs. However, design and construction costs would be repaid to the County by the property owners in an annual assessment on the property tax bills (over 15 years).
